Education & Honours

East West University — B.Sc. in Computer Science and Engineering (CSE)

2022 – 2026

CGPA: 3.70/4.00

Dhaka, Bangladesh

- **Dean's List Scholarship** (Fall 2024) — maintained 3.75+ CGPA across three consecutive semesters (35+ credits)
- **Merit Scholarship** (Fall 2025) — achieved 3.90+ CGPA across three consecutive semesters (35+ credits)

Research Interests

Software Architecture and Design; Software Testing and Analysis; Empirical Software Engineering; AI-Driven Software Engineering; Machine Learning and AI for Healthcare.

Publications

Configuration Quality Failures in LLM-Generated GitHub Actions Workflows: A Comparison with Human-Validated Baseline

CCIW @ ICST2026 — Sajid Ahmed, Samia Rahman, Tasnia Farin Ifa, Proma Chowdhury

MSCL-DINO: A Multi-Scale Lesion-Aware DINOv2 Framework for Endoscopy Classification

Diagnostics (MDPI)2026 — Submitted — Sajid Ahmed, Kabira Kalam, Samia Rahman, K. M. Safin Kamal, Ahmed Wasif Reza

Research Experience

Research Assistant — Supervisor: Proma Chowdhury

2025 – Present

- Designed and led an empirical study comparing configuration smell prevalence between human-validated and LLM-generated GitHub Actions workflows; built a Python static analyzer implementing 15 rule-based checks across Security, Reliability, and Performance categories
- Analyzed 1,318 paired workflows across six LLMs; all models produced on average 1.8× higher smell density than human baselines, with security smells appearing exclusively in LLM outputs
- Published as first author at CCIW 2026, co-located with ICST 2026 (A-level conference), South Korea; currently extending into a journal submission with an independent real-world dataset, informed vs. uninformed LLM prompting experiments, and stronger statistical rigor

Research Assistant — Supervisor: Dr. Ahmed Wasif Reza

2025 – 2026

- Designed MSCL-DINO, a hybrid Vision Transformer for multi-class gastrointestinal endoscopy classification, combining a DINOv2 backbone with Multi-Scale Lesion Attention, Top-K token selection, and Adaptive Gated Fusion
- Developed a gradient-free explainability module using EigenCAM with DINO attention-head selection for interpretable lesion localization; led end-to-end ablation studies and SOTA comparisons

Undergraduate Thesis — Supervisor: Dr. Md. Hasanul Ferdous

Capstone Project

Python, Facebook Prophet, Isolation Forest, MQTT/TLS, ESP32

- Built an end-to-end IoT sensing system fusing four sensor streams (pH, turbidity, TDS, temperature) via ESP32 over MQTT/TLS; applied Prophet for forecasting (temperature RMSE: 0.4614) and Isolation Forest for anomaly detection, achieving 38/43 overlap on a real physical disturbance event across 4,316 field observations
- Owned the full research lifecycle independently: hardware prototyping, firmware, data collection, modelling, and thesis writing

Professional Experience

BrainiconTech — Full Stack Engineer Intern

Jun 2026 – Present

Python, Django REST Framework, React, JavaScript

Dhaka, Bangladesh

- Worked on **Storio**, a multi-tenant SaaS platform enabling schools and colleges to build and manage their own institutional websites
- Built and debugged core multi-tenancy infrastructure using Django and django-tenants, handling tenant isolation, schema-based data separation, and Docker-based environment configuration
- Implemented Role-Based Access Control (RBAC) to manage permissions across different tenant user roles
- Developed backend REST APIs with Django REST Framework and integrated them with a React-based frontend

Skills

Computer Vision / ML / AI: DINOv2, Vision Transformers (ViT), PyTorch, Explainable AI (EigenCAM), Deepfake & Image Classification, HuggingFace Transformers, Time-Series Forecasting (Prophet), Anomaly Detection (Isolation Forest), Ensemble Methods, Feature Engineering, Hyperparameter Tuning, Model Evaluation

Languages: Python, Java, C, HTML/CSS, PHP

Frameworks & Libraries: Scikit-learn, Pandas, NumPy, Django, React, Bootstrap, Hadoop, Spark

Databases & Tools: MySQL, SQLite, FAISS, Git, GitHub, Jira, Trello, Figma, n8n
